

SPHERO™ Fluorescent Particle Slides

- Aids in the routine alignment and calibration of Laser Scanning Cytometers, confocal fluorescent microscopes and other fluorescent imaging systems
- Used to determine the sensitivity and system performance
- Rainbow and Ultra Rainbow Particle Slides contain a mixture of fluorophores and intensities which allows detection in multiple channels.

The Fluorescent Particle Slides are designed for routine alignment and calibration of Laser Scanning Cytometers, confocal fluorescent microscopes and other fluorescent imaging systems. The slides are prepared by mounting Fluorescent Particles or Rainbow Fluorescent Particles in a permanent mounting medium.
